

Action plan submitted by Hasan Geldi for Tahsilli Şehit Hulisi Emre Dilci İlkokulu - 23.01.2021 @ 15:10:07

By submitting your completed Assessment Form to the eSafety Label portal you have taken an important step towards analysing the status of eSafety in your school. Congratulations! Please read through your Action Plan carefully to see what you can do to improve eSafety further in your school. The Action Plan offers useful advice and comments, broken down into 3 key areas: infrastructure, policy and practice.

## Infrastructure

### Technical security

- › Your school system is protected by a firewall. Ensure that the provision and management of the firewall are regularly reviewed and updated, as and when required.
- › An educational approach and building resilience in pupils of all ages is also key to safe and responsible online use so bring together all teachers to have a discussion on how they will talk to their pupils about being a good and safe digital citizen. See [www.europa.eu/youth/EU\\_en](http://www.europa.eu/youth/EU_en) for examples of discussions that can take place in the classroom on this topic, through role-play and group games.
- › It is good practice that your ICT services are regularly reviewed, updated and removed if no longer in use.

### Pupil and staff access to technology

- › You should organise a meeting with other teachers so you can discuss how the school could use social media and digital devices as an aid to learning in the classroom. Look at the outcomes and report from the SMILE project (Social Media in Learning and Education, <http://www.eun.org/teaching/smile>) to learn more about using social media in the classroom.

### Data protection

- › You have a good policy of keeping your learning and administration environments separate. It is good to ensure that staff training on managing these environments is up to date as you continue to review your policies. Share your policy with other eSafety Label users by uploading it to your school profile.
- › It is good that all users are attributed a different password by the system in your school. Remind all school members never to write their given password down anywhere, certainly not on a sticker on a computer! Also, ensure that the Acceptable Use Policy reminds staff and pupils to keep their passwords secure and not share them with others.

### Software licensing

- › Your school has set a realistic budget for software needs. This is good. Ensure that it remains this way. You might also want to look into alternatives, e.g. Cloud services or open software.
- › It is good that you can produce an overview of installed software and their licences in a short time frame with the help of several people. Consider centralising this.

## IT Management

- › It is good practise that you are training and/or providing guidance in the use of new software that is installed on school computers. This ensures that school members will take advantage of new features, but also that they are aware of security and data protection issues where relevant.
- › In the interests of innovative pedagogical practice, it may seem necessary to allow staff and pupils to upload software to school-owned hardware, however this should only be done by the person in charge of the school ICT network in conformity with the School Policy. Staff and pupils should be aware of this through the Acceptable Use Policy they are required to sign. All new software uploaded to school equipment needs to be in conformity with licensing requirements.

## Policy

### Acceptable Use Policy (AUP)

- › It is good that you have an Acceptable Use Policy for all members of the school community. Regularly review the AUP to ensure that it is still fit for purpose; to ensure that your AUP is sufficiently comprehensive, take a look at the fact sheet and check list on Acceptable Use Policy at [www.esafetylevel.eu/group/community/acceptable-use-policy-aup-](http://www.esafetylevel.eu/group/community/acceptable-use-policy-aup-).

### Reporting and Incident-Handling

- › Check that your School Policy includes all necessary information for teachers about handling issues when pupils knowingly or even inadvertently access illegal or offensive material online by going to the guidance set out by the [teachtoday.de/en](http://teachtoday.de/en) website ([tinyurl.com/9j86v84](https://tinyurl.com/9j86v84)). If such incidents arise in your school, make sure you anonymously fill out the eSafety Label Incident handling form ([www.esafetylevel.eu/group/teacher/incident-handling](http://www.esafetylevel.eu/group/teacher/incident-handling)) so that other schools can benefit from your experience.
- › Ensure that all staff, including new members of staff, are aware of the guidelines concerning what to do if inappropriate or illegal material is discovered on a school machine. Ensure, too, that the policy is rigorously enforced. A member of the school's senior leadership team should monitor this.
- › Are all staff familiar with the procedure for dealing with material that could potentially be illegal? Is there a named person from the school senior leadership team who takes overall responsibility in this type of case? The procedure needs to be clearly communicated to all staff in the School Policy, and to staff and pupils in the Acceptable Use Policy. Remember to report and suspected illegal content to your national INHOPE hotline ([www.inhope.org](http://www.inhope.org)).

### Staff policy

- › In your school user accounts are managed in a timely manner. This is important as it decreases the risk of misuse.
- › It is good practice that the school policy includes information about risks with potentially non-secured devices, such as smartphones and that reference is made to it. Consider sharing your school policy via the uploading evidence tool, also accessible through the [My school area](#).
- › You have guidelines in your Acceptable Use Policy (AUP) on teachers' classroom usage of mobile phones. Upload your AUP to your school profile as it is a model of good practice that can help other eSafety Label schools.

## Pupil practice/behaviour

- › When discussing eSafety pupils at your school can sometimes provide feedback on the activities. Involve them as much as possible so that the teacher recognises real life issues while the pupils are more engaged.

## School presence online

- › It is good that pupils can give feedback on the school's online presence. Think about creating a space that is entirely managed by pupils. It's a great opportunity to learn about media literacy and related issues. It also can help to establish a peer network of support. Find out more about in the eSafety Label fact sheet.
- › You have a dedicated person to monitor your school's online reputation, and this is good practice. Always be aware of any new sites that may not be immediately apparent through a regular search. Keep up to date with the latest sites and monitor these periodically, as they can be particularly damaging for schools and their pupils and staff if they present a negative viewpoint.

# Practice

## Management of eSafety

- › Technology develops rapidly. It is good practice that the member of staff responsible for ICT is regularly sent to trainings and/or conferences to be aware of new features and risks. Check out the [Better Internet for Kids portal](#) to stay up to date with the latest trends in the online world.

## eSafety in the curriculum

- › While it is good that you discuss consequences of online actions terms and conditions, online payments and copyright with older pupils, consider discussing these also with young pupils.
- › It is good that you are making a specific reference to sexting within your child protection policy as this is a growing issue that many young people are having to deal with. It is also important to ensure that you are providing appropriate education for pupils about this issue.
- › It is good practice that all pupils in all year groups in your school are taught about eSafety. It continues to be important to review regularly the curriculum provision to ensure it meets ever-changing needs. If you have a curriculum review process of this kind, it would be helpful to other schools if you could publish this on your school profile. To upload go to your [My school area](#).

## Extra curricular activities

- › Consider carrying out a simple survey in order to establish what pupils are doing when they go online. This will help to inform eSafety education within the school. Share your survey questionnaire and results in the eSafety Label community via your [My school area](#) (avoiding publishing any personal information) so that other schools can benefit from your work and even share their results with you for comparative purposes.
- › It is good to know that you are frequently using the online eSafety resources from your national Safer Internet Centre. Have you found these resources helpful in your school? Please send your feedback on their use and value to [info-insafe@eun.org](mailto:info-insafe@eun.org).

## Sources of support

- › Ask parents for feedback on the kind of eSafety support which is being provided for them and consider innovative ways to maximise the number of parents who are benefitting from, and accessing it. See the fact sheet Information for parents at [www.esafetymal.eu/group/community/information-for-parents](http://www.esafetymal.eu/group/community/information-for-parents) to find resources that could be circulated to parents and ideas for parent evenings.
- › It is great that you have a staff member which is knowledgeable in eSafety issues who acts as a teacher of confidence to pupils.
- › Young people are more open to advice from their peers. Consider offering optional courses and/or school rewards on eSafety topics or similar that stimulate expert knowledge in pupils that then could become a point of reference for their peers.

## Staff training

- › Your school makes sure that every teacher is trained on cyberbullying. Please share resources that are used in these trainings via uploading them to your [My school area](#). Are you also monitoring the effect that this training had on the number of incidents?

**The Assessment Form you submitted is generated from a large pool of questions. It is also useful for us to know if you are improving eSafety in areas not mentioned in the questionnaire. You can upload evidence of such changes via the [Upload evidence](#) on the [My school area](#) section of the eSafety Portal. Remember, the completion of the Assessment Form is just one part of the Accreditation Process, because the upload of evidence, your exchanges with others via the [Forum](#), and your [reporting of incidents](#) on the template provided are all also taken into account.**
